Integrated MILES – Tactical Vehicle System (IMILES-TVS) Information Assurance

Results

- Certification and accreditation of the initial I-MILES TVS in 9 months

Benefits

- Allowed operation of the I-MILES TVS in a secure environment
- Provided the capability to operate the instrumentation on a military network

Problem

The I-MILES TVS requires wireless interfaces to operate, and the system must achieve an Authority to Operate (ATO) indicating it is able of operating securely on military ranges.

Solution

- Ensure the system can operate securely
- Prepare the DIACAP package for the overall system and submit for certification and accreditation
- Receive an ATO for the I-MILES TVS
